

ABOUT COMPANY

The Welding Group consortium has been operating on the industrial market for more than 19 years and is the leader in Kazakhstan in the supply of high quality welding equipment and materials. The consortium includes companies: Welding Solutions LLP and Fin Weld Azia LLP.

The main goals of the company are:

- Providing its customers with high quality and innovative products from leading companies in the USA, Europe and Asia
- Facilitation of work processes in the customer's production and reduction their cost
- Increasing the very level of production at enterprises of various industry direction

Our product is interesting both for large companies with strict requirements to quality, safety, versatility and the latest technology, and for individuals who are interested in simplicity, convenience in use and price. "Welding Group" has 6 branches with exhibition halls equipped with warehouses in Atyrau, Almaty, Aktau, Pavlodar, Karaganda and Ust-Kamenogorsk. The consortium has 2 certified service centers in the cities of Atyrau and Almaty, in which employ highly qualified specialists. The company has implemented ISO 9001:2015 Quality Management System is used.

OUR MISSION

We are making an engineering and technical revolution in the industry of Central Asia through the introduction of advanced welding technologies.

- **Slogan: Welding Group - at the top of technology**
- **Motto: Keep your word - do not drop your reputation!**
- **Values.**
- **Command.**

The key to our success is teamwork.

We are all different. It does not matter how old you are, what experience you have, it is important that together we are a team of professionals. We are united not by slogans, but by a single vision of the world, honesty, desire to do what you love and introduce new technologies. Indifference to the overall result, punctuality in everyone and high quality of work are our main principles of team interaction. We provide personal resources for the use of colleagues (contacts, acquaintances, connections, assistance) for a team result and the best customer service. If you have information that is interesting to another employee for work - give it to him immediately, do not be greedy.

-Customer orientation.

We do not sell a product, but a complete solution for the client. Every day we look for (select) new approaches to work that allow us to achieve the best result using the least resources (time, financial costs, human resources).

We are looking for ways that simplify the transaction process for the client and solve his problems (close his needs) with a future perspective.

We don't say "we can't do it", we say "what can we do to achieve the goal?".

-Loyalty of employees and maintaining the image of the Company.

We know that the most important person in the company is the client. And it depends on our actions whether he stays with us or goes to a competitor.

We care about the practical result for the client and take care of the Company's image at all stages of the business (service).

And if it is convenient for a client to interact with us on a day off, we will do it for him. If the client asks for the delivery of the goods to the moon, we will figure out a way to do it. For us above all, the reliable reputation of the Company in the eyes of customers and partners.

If an employee caused a loss to the Company, we will sort it out, but if he caused damage to the Company's reputation, we will not forgive.

- Development.

We value the loyalty of employees and the desire to develop.

We are ready to invest resources in those who have repeatedly proved by deeds that they are not indifferent to the overall results and want to continue to grow together with the Company.

If a valuable employee "grew" from a specific position, we will find him a worthy place in the Company.

Regular training in new technologies is also our integral value.

We know everything about the products and technologies that we sell today and study information about what will be relevant tomorrow. Only with this approach we always remain at the top of technology.

- Proactivity

We do not follow demand - we go ahead of it. We periodically evaluate ourselves from the future and ask ourselves questions: "What can we do today differently, better, easier and more efficiently, to achieve even greater results tomorrow? What will we regret not doing today? We analyze, predict and implement in work today.

WE ARE PROUD

- Project Construction of the Bolashak plant in Karabatan.
- TCO SGP and SGI project in Tengiz.
- TCO FGP-WPMP project.
- Project "Asian Gas Pipeline "China-Kazakhstan Pipeline". Threads "A", "B", "C". Construction compressor stations SCS 1-8.
- CPC Expansion Project. Construction of the pipeline at 116 - 204 km, as well as the construction pumping stations.
- Construction of associated gas utilization units at the Kozhasai and Alibekmola fields.
- Project "Reconstruction of the Atyrau Atyrau Atyrau Refinery": construction of a complex for deep oil refining, construction of a complex for the production of aromatic hydrocarbons.
- Project "Construction of the Beineu-Bozoi-Shymkent gas pipeline".
- Project "Development of the Kashagan field".
- Supply of welding consumables to Intergas Central Asia.
- Project "Construction of the oil pipeline Kazakhstan - Uzbekistan".
- Project "Construction of the main gas pipeline Saryarka".
- Project "Construction of a glass factory in Kyzylorda".
- Project "Reconstruction and modernization of the Shymkent refinery".
- Project "Reconstruction and modernization of the Pavlodar refinery".
- Supply of welding equipment and materials to the Republic of Uzbekistan, oil and gas projects Lukoil and Enter Engineering Pte. Ltd."
- Deliveries of welding equipment and materials to the main contractors for KPO BV projects. Deliveries for NCOC projects
- Supply of welding equipment for the project for the construction of an integrated gas chemical complex (IGCC) of Kazakhstan Petrochemical Industries (KPI) in the Atyrau region. Deliveries to the largest companies of Kazakhstan - "Kazzinc", "ERG", "Kazakhmys".

WeldProfi, KAZAKHSTAN PRODUCTION

The Welding Group consortium supplies its customers with welding carriages and wire under the brand name WeldProfi.

WeldProfi welding carriage – automatic equipment for moving welding torch for semi-automatic MIG/MAG or argon-arc TIG welding along the contour to be welded. Welding the tractor is used to automate the welding of longitudinal vertical and horizontal seams, welding of pipes and shells. Carriage is produced in modifications on the chassis with all-wheel drive on four wheels or on a chassis on a rigid rail.

Over the years of its existence, the brand has established itself as a price-quality ratio.

WE MELT ANY METAL PRODUCT

- More than 50,000 welded parts of various types
- Modern surfacing materials and technologies from leading global brands
- Own production workshop with the necessary equipment

Let's melt EVERYTHING

- Any blades and teeth
- Buckets and blades
- Drilling rigs
- Stabilizers
- Discs and blades
- Metal shredders
- Track rollers and tracks
- Stars, sloths
- Forks
- Guide wheels
- Bridges, axles, drums

TRAINING AND RETRAINING OF WELDERS

We offer you an exclusive service - training and retraining welders on the territory of your enterprise with maximum focus to the specifics of your production! Level of education: increase qualifications and retraining in two welding methods:

- **Manual arc (RDS, MMA, III)**
 - **Semi-automatic in shielding gas (MIG/MAG, FCAW, 131, 135, 136, 138). Volume of training: 80 hours (10 days), of which 10 hours - theoretical part, 70 hours - practical part.**

Conditions of education:

- Development of individual programs for each client
- Group: 3-6 people
- Training period 10 working days
- Tuition from 15,000 tenge per person per day
- Training is conducted by specialists with international and European certificates. Learning outcomes: By the end of the training, the welder:
 - Selects appropriate welding tools and materials
 - Proficient in assembling and preparing parts for welding
 - Actively uses and applies the above welding methods
 - Performs quality control and corrects defects when necessary
 - Confidently applies new technologies in welding. Thereby increased productivity, reduced turnaround time work, reduce injuries at work.

TRAINING AND RETRAINING OF WELDERS

The Welding Group consortium offers its customers welding simulator Soldamatic.

It is a powerful tool for training and professional development welders. It works with the so-called add-on technology reality (AR). No safety precautions for working with welding simulator is not required, training can take place in any conventional classroom or conference room, which will avoid any costs labor for the preparation of material consumption.

Help functions AR (Augmented Reality Technology) gives precise assistance for positioning the welding torch and maintains speed during the welding process. In this way, the learning process is accelerated and its quality is significantly improved.

Soldamatic uses gamification to increase student motivation, as well as individual training, taking into account the personal needs of each.

Curriculum developed by international experts high-level training in welding, including the course "International welder" in accordance with the requirements of the European Welding Federation (EWF) and International Institute of Welding (IIW), also sufficient to pass the SENSE certified by the American Welding Society (AWS).

UNION OF OILFIELD SERVICE COMPANIES OF KAZAKHSTAN

Welding Solutions LLP is a member
ALE "Union of Oilfield Service Companies of Kazakhstan",
as well as the Kazakhstan Association of Welding "KazWeld".
